

Great teaching matters - but even top teachers know that students can lose interest in lessons when they think their music is boring! And it's especially tricky with early level students of all ages since so many of them want their music to sound mature and impressive.

But that's just the kind of music we're committed to publishing at ComposeCreate. We believe that people, especially children and teens, are worthy of our respect and that they deserve music that is both interesting and beautiful no matter what level. So we only publish Music Kids Love®, Music Teens Love®, & Music Adults Love®.

It might sound like a lofty goal, but as thousands of teachers all over the world have discovered, you'll find that this music is music students truly love! And I'm excited to show you Music Kids Love® at the August 26th webinar!
